

Samples to Success

Sample items provide valuable insight into how students engage with different texts, tasks, and contexts, highlighting the types of opportunities they need for success in the classroom. These items offer a shared reference point for understanding proficiency expectations, complementing the assessment's role in measuring learning. By analyzing items alongside performance data, educators can gain a deeper understanding of students' strengths and areas for growth. Students thrive in environments rich with diverse materials, challenges that vary in task type, and multiple avenues for demonstrating understanding. High-quality instruction, aligned with the learning goals, is the most effective way to support students' growth and prepare them for success.

Test questions can measure a single skill or a set of knowledge and skills. The ELA test differs from other subjects in that it has fewer items overall, but each item assesses multiple skills or knowledge by asking students to demonstrate skills through performance, such as writing a response to literary or informational texts. Therefore, what differentiates the levels of performance are the degree to and quality with which a student performs.

Grade 4 – Claim 1: Reading Literary Text

1st Text – P. 5-6

English Language/Literary

Today you will read the story "The Peacock" and listen to an audio recording. As you read and listen to these selections, you will gather information and answer questions about the two different versions of the story so you can write a response.

Read the story "The Peacock." Then answer the questions.

The Peacock
By Anoop

1. The Peacock, they say, did not at first have the beautiful feathers in which he now takes so much pride. These, first, were feathers for use, granted to him only when he stepped for a brief of feathers to distinguish him from the other birds. They, tucked in his throat, gleaming with silver, gold, purple, and blue, he showed proudly among the birds, as he ranged his wings with every breeze from the most beautiful pheasant could see that his beauty was increased.

2. Presently the Peacock saw an Eagle soaring high up in the blue sky and felt a desire to fly, as he had been accustomed to do. Lifting his wings he tried to rise from the ground. But the weight of his magnificent blue tail had been down. Instead of flying up to greet the first rays of the morning sun or to

Writing Task – P. 17

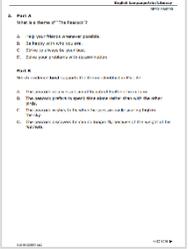

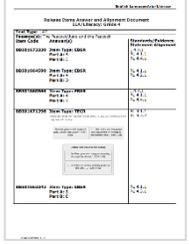

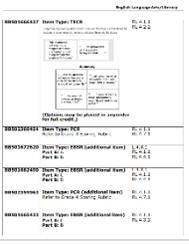

English Language/Literary

17. You have read "The Peacock" and have listened to *Juno and the Peacock*. Write an essay that compares and contrasts the two different versions. Be sure to include details from **both** versions in your essay.

Multiple items on the Illinois Assessment of Readiness (IAR) are linked to a set of texts to read, often accompanied by images or multimedia. The sample [item set](#) has two sections from a literary text and a writing task. Small screenshots and page numbers are provided to help you navigate the linked sample item set.

Each text is followed by several two-part multiple-choice items. Students must select a correct response in Part A and supporting evidence in Part B. The set also has an item in which students correctly match setting details into a table where partial credit is possible.

This sample item set also contains a Literary Analysis writing task comparing two texts. Student responses are graded according to page 3 of the [Literary Analysis Rubric](#). Literary writing tasks often contribute to a student's **Reading Comprehension** score in addition to their **Writing** score. Student writing samples and annotations are found in the Written Expression Claim section in this document.

1st Text P. 4-6

English Language Arts/Literacy

Read the passage from "Grandpa's Hobbit House." Then answer the questions.

from "Grandpa's Hobbit House"
by Marcy Kacvighner

1 My adventure in homebuilding began about four years ago, when I decided to make some changes in my life in response to Mother Earth. The one thing I cannot see a 57-acre backyard near Piny, Wis., but I want out to the field and get in the big grass. All I see the good earth below me and gazed at the expansive sky above. I began to imagine a dwelling, not like a house.

AN EARTH-FRIENDLY HOME

2 My idea of a homebuilding started with building a simple home out of natural materials. I wanted an eco-friendly living structure, and my intention was to build it round, like a beehive house, so the energy could flow around it. I did not want any electricity or plumbing. I had more at peace when not surrounded by electricity, and plumbing never made much sense to my way of thinking. I think structures are very practical because they don't waste so much water.

3 I began the two-year project of creating a home by turning a circle of red cedar posts around the perimeter. Next, I framed the roof by inserting logs between rafters from a center pole to the posts. Last night, I took a walk across the new rafters. There, on top of the boots, I put No. 30 hot paper and two layers of a 1/2 inch black plastic. I cut blocks of soil—blocks of earth, with grass, insect nests and soil—

Read the article "A Sweet Memory: A True Story of a Guide Dog Graduation." Then answer the questions.

A Sweet Memory: A True Story of a Guide Dog Graduation
by Sarah A. Fowler

1 For the longest time ever, I had wanted a dog of my very own that I could do everything for. My parents decided that would make a dog for Guide Dogs. I was 10 years old when I was given a dog named Toby. He was a golden retriever, and he was very smart. He was very smart. He was very smart.

2 For a year, I did everything for Toby. I bathed him, fed him, took him to guide dog training, and got all kinds of things for him. He was very smart. He was very smart. He was very smart.

3 On September 26, 2009, I went to Toby's graduation. He was very smart. He was very smart. He was very smart.

4 Four months later, Toby graduated as a guide dog with his partner, Mr. Bill. He was very smart. He was very smart. He was very smart.

5 This is the story of Toby's graduation.

6 I had graduated, January 26, 2009, and I was with the family of the guide dog for the blind campus to see my dog, Toby, graduate as a guide dog for Mr. Bill. He was very smart. He was very smart. He was very smart.

7 I was excited and nervous at the same time. I hadn't seen Toby for four months, and Toby's personality changed. He was different. I had a million questions running through my mind.

8 When we finally saw Toby, I was walking a staff member walked into the room and said, "Congratulations, Toby! You're a guide dog now. You're a guide dog now. You're a guide dog now."

9 Once everybody was seated in the dorm, the staff started bringing out the guide dog and their partners.

10 I was in another room because my group was larger. I could hear everybody laughing and crying as they saw their guide dogs. But when we had Toby.

11 After waiting a few minutes, I saw someone leading a man on the other side of a one-way street. I knew him, he was very much the same, a beautiful golden-brown color, with his buddy hat, long ears, and always the same bark in his voice.

12 When Toby saw me he rushed at me and licked me on my face. He couldn't stop. He was so happy to see me again. I looked at him beautiful golden boy. I was overwhelmed. I had waited so long for this day.

Read the article "Tiny-Bitty Houses." Then answer the questions.

Tiny-Bitty Houses
by Dan Klores

1 Widespread about low overhead costs, many Americans are embracing the idea that a bigger home is not always better. Concerns about carbon footprints and energy costs mean that where Millennials once gravitated, a small-house movement has taken root. Just ask Fred Korte, who runs Tiny Homes Hoards, a company specializing in very small dwellings—the largest has a 12-by-28-foot floor plan—constructed almost entirely from salvaged wood. In 2007, Korte built four homes. This year he built ten. And he plans to start leading tiny-house-building seminars. "I can't build enough to keep up with demand," he says.

2 Korte is not alone when it comes to diminutive home design. The biosphere buzzes with tales of individuals living in micro-structures of less than 100 square feet.

3 Of course, not everybody wants to downsize so radically. That's one reason architect Sarah Susanka advocates that people tailor their expectations according to context, not doctrine. In a small-giving, Susanka is author of *The Not So Big House* (Taverton, 1998), recently updated for its tenth anniversary. "Each household is different," she says. "Basically, the ideal house is a third smaller than what people think they need. I tell them, 'If you live with less space, you get a lot more bang for your buck.'"

4 That message resonates. Gopal Akhavan, vice president of research at the National Association of Home Builders in Washington, D.C., believes that between the mortgage meltdown and the green building boom, the door is closing on crazy-big houses. "We're seeing a trend toward stabilization," he says. "I don't think the size will go up any more."

"Tiny-Bitty Houses" by Dan Klores. MESSAGE, January/February 2008. © 2008 Sarah Klores.

Here we provide [an informational text sample item set](#). The set contains a set of informational texts to read along with several multiple-choice items. Small screenshots and page numbers are provided to help you navigate the linked sample item set.

Each informational text is followed by several two-part multiple-choice items. Students must select a correct response in Part A and supporting evidence in Part B.

The item set also contains a Research Simulation writing task. Student responses are graded according to page 3 of the [Research Simulation Task Rubric](#). All Research Simulation writing tasks contribute to a student's **Reading Comprehension** score in addition to their **Writing** score. Student writing samples and annotations are found in the Written Expression Claim section in this document.

Grade 4 – Claim 3: Reading Vocabulary

2nd Text P. 10-11

English Language Arts/Literacy

Read the article "A Sweet Memory: A True Story of a Guide Dog Graduation." Then answer the questions.

A Sweet Memory: A True Story of a Guide Dog Graduation
by Sarah K. Fowler

1 For the longest time ever, I had wanted a dog of my very own that I could do everything for. My parents advised that I could have a dog for graduation, but I didn't want to wait until then. I was so excited when I found out that I could have a dog for graduation. I was so excited when I found out that I could have a dog for graduation. I was so excited when I found out that I could have a dog for graduation.

2 For a year, I did everything for Tully. I bathed him, fed him, took him to guide dog meetings, and read to him. I loved him, we read everything to me.

3 On September 20, 2020 I gave Tully back to Guide Dogs for the Blind for advanced training. I chose to let him stay over here and I could see him.

4 Four months later, Tully graduated as a guide dog with the partner, Mr. Bill (blind).

5 This is the story of Tully's graduation.

6 I was nervous. In early 2020, and I was with my family at the Guide Dogs for the Blind campus to see my dog, Tully, graduate as a guide dog to Mr. Bill (blind).

7 I was excited and nervous at the same time. I hadn't seen Tully for four months, but Tully's personality changed and he was different. I had a million questions running through my mind.

8 When we first met and I was walking, a staff member walked into the room and said, "Hi everybody, I'm happy. I had you all around about seeing your dog again. It just took you over to the dog, when you'll meet them." She passed and looked around and her look. "Hello, then, let's go."

9 Once everybody was seated in the room, the staff started bringing out the guide dogs and their partners.

10 I was in another room because my group was larger. I could hear everybody laughing and crying as they saw their dogs again. But when was Tully?

11 After waiting a few minutes, I saw someone leading a man on the other side of a low wall. Then, I knew him, he was very much the same as a beautiful golden-brown color, with his healthy tail, long ears, and always the same terrible in his eyes.

12 When Tully saw me he rushed at me and looked over my shoulder. He wasn't that happy. He was so happy to see me again. I heard at the beautiful golden boy. I was overwhelmed. I had waited so long for this day.

and put a 6-inch layer of soil over the plastic. Next came the real work of filling the area between the posts with bricks of soil. Because I'm on a hill and have a terrific view, I chose to have lots of windows, which cut down on the amount of soil I needed.

4 After laying the soil bricks, I applied three coats of soil – a day and straw mixture – to the soil walls. GB is wonderful stuff and can be molded into any shape imaginable. It had a lot of being around. Now here I am in my home, which is about 200 square feet and looks like the finest house I've ever seen. I took some photos of the level of the things. My house was built one handful at a time using basic hand tools, all for a cost of about \$3 a square foot.

THE HOMESTEAD EXPANDS

5 Over the past four years, I've added several buildings to my homestead. The first was a rock cellar. When I moved in, I started a big garden, about 60 feet by 150 feet, so I needed a place to store food – nothing fancy, just a hole in the ground. As I dug the hole for my rock cellar, I piled limestone rocks out of the ground and saved them for later use. The "limestone" gave me some of the walls of the rock cellar and provided a solid support for the soil roof. Thanks to the ROTHEF DARTY HEDIES articles about how and why to build a rock cellar, I now have a better way to keep cabbages and other produce fresh year-round.

6 Every homestead needs a shed of some sort, and that was my next project. I made this building in the shape of a rectangle by using old hay bales for the walls. Then I applied three coats of soil to the bales. The bale construction was much faster than the soil and provides better insulation. I kept two goats in the shed all winter, and they stayed warm.

7 Sometime, I always managed to have chickens. They seem to be part of my life here on Earth. I needed to build a chicken coop, so I attached it to the shed and dug it partially into the hill. This, combined with the hay bale construction, made the coop very warm.

Reading vocabulary items are found within Reading Informational and Reading Literary item sets. This [released item set](#) (the same sample set from Claim 2) contains two embedded reading passages; items; and an associated answer key, which is located at the beginning of the document. (Screenshots are included to support navigation of the linked items.)

Vocabulary items ask students to select a correct response in Part A and then to select a response that supports that answer in Part B of the item.

Writing Task P. 8

Small houses are discussed in the passage from "Grandpa's Hobbit House" and the article "Tiny-Bitty Houses." Write an essay that describes the key benefits of these types of houses. Be sure to include examples from both texts to support your ideas.

For Research Simulation Writing Task – See Claim 2 to view all associated texts with the item.

The Written Expression Claim is measured through writing tasks. These [sample student responses](#) are from the Research Simulation Task introduced in Claim 2. This is followed by examples of student writing at different point levels. Comparing student responses to rubric criteria allows us to see how students earn points for performance of specific skills.

The IAR [writing rubrics](#) align with performance level descriptors (PLDs) by specifying how different aspects of writing correspond to these proficiency levels. Each writing sample is followed by notes that explain the rationale for the student's **Written Expression** score according to the rubric. The samples begin with the highest-scoring example and end with the lowest-scoring example.

4 Points P. 10-12	3 Points P. 17-18	2 Points P. 23-24	1 Point P. 29-30	0 Points P. 34
A1a Score Point 4	A3a Score Point 3	A5a Score Point 2	A7a Score Point 1	A9 Score Point 0
Notes P. 13	Notes P. 6	Notes P. 25	Notes P. 31	(Notes) P. 35
<p>Annotation</p> <p>Anchor Paper 1</p> <p>Reading Comprehension and Written Expression</p> <p>Score Point 4</p> <p>The analysis is accurate and narrows the topic to the low cost of small houses. Text support throughout is relevant and ample. Text from "Grandpa's Hobbit House" defines the potential construction cost of a smaller house and provides evidence for the reasons the cost is so low. Clear reasoning adds depth to the development by connecting the text codes and explaining how the ideas relate to one another, and contribute to the lower cost (the house costs less than the average house because it has no electricity or plumbing and it's built out of the surroundings which reduces the monthly payments because he doesn't have to pay for supplies to build his house, he doesn't have to buy an electrical kit, and he doesn't have to pay the water bill). Text from "Tiny-Bitty Houses" is used equally effectively to establish the availability and suitability of smaller houses, supported by reasoning that smaller houses are "less expensive than the average house" allowing you to "save for other important things." The organization is effective with ideas grouped by passage and further delineated with text followed by reasoning, resulting in clear writing.</p>	<p>Annotation</p> <p>Anchor Paper 3</p> <p>Reading Comprehension and Written Expression</p> <p>Score Point 3</p> <p>The analysis is mostly accurate, identifying the lower environmental costs as a key benefit to small houses, and demonstrating comprehension of explicit ideas from the passage. Comprehension of ideas inferentially stated is demonstrated with the reasoning that smaller houses do not waste and. The response is organized with a functional introduction and conclusion and a paragraph devoted to each passage. Additionally, using phrases within each paragraph (To begin with, In addition) and clarify the connections between ideas (This means that, This shows me), resulting in writing that is mostly clear. The development is mostly effective with both passages utilized to explain the connection between small houses and the environment. A reasonable resource identified the idea that Grandpa's House "is built for the environment because making a small roof house saves energy." The development here is mostly effective, but not consistently strong. Grandpa is undervalued "resourceful," but this reasoning does not relate to the environmental benefits of his home. More relevant detail would result in more consistently appropriate development. The development in the section regarding "Tiny-Bitty Houses" is more effective. The quotation clearly supports the reasoning that oversized houses "leave a large amount of space empty."</p>	<p>Annotation</p> <p>Anchor Paper 5</p> <p>Reading Comprehension and Written Expression</p> <p>Score Point 2</p> <p>Generally accurate analysis reveals a number of benefits to smaller houses (don't cost much, made of natural resources, earth friendly). The response is somewhat developed, with reasoning and text. However, each text reference is a repetition of the previously stated analysis (Some people like to be in nature so some people don't put in plumbing and electricity and other modern things also like in Grandpa's Hobbit House" when he said "I feel more at home surrounded by electricity and plumbing"). Additionally, the quote selected is not the most relevant support for the idea that small houses are earth friendly. The response demonstrates some organization with linking phrases used within and between ideas (Plus more, Just like).</p>	<p>Annotation</p> <p>Anchor Paper 7</p> <p>Reading Comprehension and Written Expression</p> <p>Score Point 1</p> <p>This response attempts to utilize a compare and contrast strategy (Grandpa's house is bigger than the tiny-bitty houses), which is limited in its appropriateness to the task. The series of comparative statements does reproduce minimal development (Ideas are not always grouped logically, for example, the response includes the observation that bigger houses provide more space and talks about the cost before returning to the idea of space noting that "The less space you have in a tiny home." The linking word "but" is used frequently between ideas, which, along with introductory and concluding elements, demonstrates limited organization.</p>	<p>Annotation</p> <p>Anchor Paper 9</p> <p>Reading Comprehension and Written Expression</p> <p>Score Point 0</p> <p>The response demonstrates no comprehension of the ideas in the passages. Although the response mentions "tiny houses" and building materials (with hay and wood) the development is centered on the story "The Three Little Pigs," and is inappropriate to the task, purpose and audience.</p>

Note: Most student responses are typed. Hand-written responses are consistent with paper-based, accommodated forms.
