

Samples to Success

Sample items provide valuable insight into how students engage with different texts, tasks, and contexts, highlighting the types of opportunities they need for success in the classroom. These items offer a shared reference point for understanding proficiency expectations, complementing the assessment's role in measuring learning. By analyzing items alongside performance data, educators can gain a deeper understanding of students' strengths and areas for growth. Students thrive in environments rich with diverse materials, challenges that vary in task type, and multiple avenues for demonstrating understanding. High-quality instruction, aligned with the learning goals, is the most effective way to support students' growth and prepare them for success.

The items featured in this rubric are a mix of items representative of those found on the Illinois Assessment of Readiness (IAR) and items appropriate for classroom instruction to support and build the skills measured on the IAR. The distinction between a student scoring proficient and above proficient on the IAR is primarily determined by the total points earned on items that require modeling and/or reasoning. Students who can effectively explain and demonstrate their thinking are most likely to earn these points.

Expectation at Proficient:

Use positive and negative integers to represent quantities in real-world contexts, explaining the meaning of 0 in each situation.

Below Proficient

Water freezes at 0° Celsius, which is 32° Fahrenheit.

Which number represents the freezing temperature of water in degrees Fahrenheit?

- A. 0
- B. -32
- C. 32
- D. 320

Approaching Proficient

Water freezes at 0° Celsius. The temperature of the water in 4 buckets is recorded in the table below.

Bucket	Temperature
A	$4^{\circ}C$
B	$18^{\circ}C$
C	$9^{\circ}C$
D	$46^{\circ}C$

Which bucket is the closest to the freezing temperature, in degrees Celsius?

- A. Bucket A
- B. Bucket B
- C. Bucket C
- D. Bucket D

Proficient

Water freezes at 0° Celsius. The table shows five different temperatures in degrees Celsius. Indicate whether each temperature is above or below freezing.

Select one box per row.

Temperature	Above Freezing	Below Freezing
$6^{\circ}C$	<input checked="" type="checkbox"/>	<input type="checkbox"/>
$-13^{\circ}C$	<input type="checkbox"/>	<input checked="" type="checkbox"/>
$100^{\circ}C$	<input checked="" type="checkbox"/>	<input type="checkbox"/>
$5^{\circ}C$	<input checked="" type="checkbox"/>	<input type="checkbox"/>
$-2^{\circ}C$	<input type="checkbox"/>	<input checked="" type="checkbox"/>

Above Proficient

Water freezes at 0° Celsius. The table shows five different temperatures in degrees Celsius. Indicate whether each temperature is above or below freezing.

Select one box per row.

Temperature	Above Freezing	Below Freezing
$6.5^{\circ}C$	<input checked="" type="checkbox"/>	<input type="checkbox"/>
$-13^{\circ}C$	<input type="checkbox"/>	<input checked="" type="checkbox"/>
$100^{\circ}C$	<input checked="" type="checkbox"/>	<input type="checkbox"/>
$5.5^{\circ}C$	<input checked="" type="checkbox"/>	<input type="checkbox"/>
$-2.25^{\circ}C$	<input type="checkbox"/>	<input checked="" type="checkbox"/>

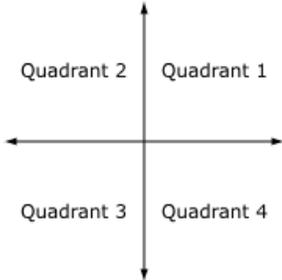

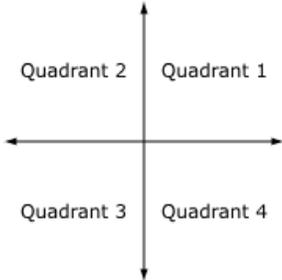

Use the meaning of zero to explain how you determined your answers.

The student response should include an explanation of positive numbers representing above zero and negative numbers representing below zero.

6.NS.6c

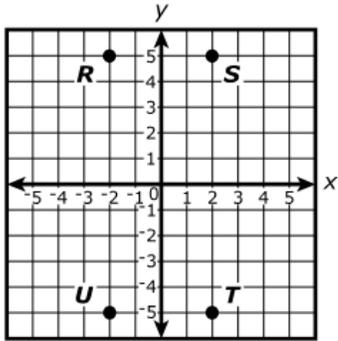

Expectation at Proficient:

Identify and position integers and other rational numbers on a horizontal or vertical number line diagram.

Identify and position pairs of integers and other rational numbers on a coordinate plane.

Below Proficient

Four points are plotted on the coordinate plane shown.

The coordinates for points R, U, and T are shown.

R (-2,5)

U (-2,-5)

T (2,-5)

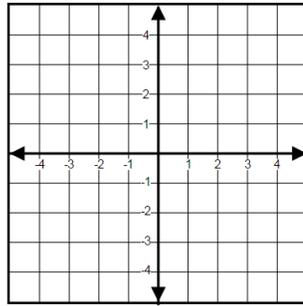

What coordinates best represent the location of point S?

(____, ____)

Answer: (2,5)

Approaching Proficient

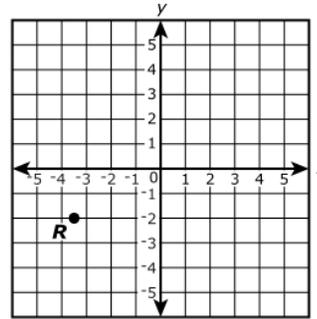

Plot the point (3,2) on the coordinate plane.

Answer: a point should be plotted right 3 units and up 2 units from the origin.

Proficient

Point R is plotted on the coordinate plane shown.

What coordinates best represent the location of point R?

(____, ____)

Answer: (-3.5, -2)

Above Proficient

Draw a coordinate plane.

On the coordinate plane, plot the following points. Be sure to label each point.

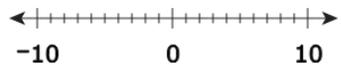

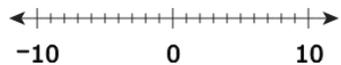

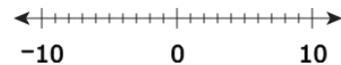

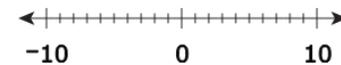

A (-2.5 , 5)

B (6 , 1.5)

C (-1.5 , 0)

Point A is 2.5 units left and 5 units up from the origin, point B is 6 units right and 1.5 units up from the origin, and point C is 1.5 units left from the origin, on the x-axis.

Expectation at Proficient:

Write an inequality of the form $x > c$ or $x < c$ to represent a constraint or condition in a real-world or mathematical problem.

Recognize that inequalities of the form $x > c$ or $x < c$ have infinitely many solutions.

Represent solutions to inequalities in real-world or mathematical problems in the form $x > c$ or $x < c$ on number line diagrams.

Below Proficient

Which inequality statement could be represented by the graph on the number line shown?

- A. $x < 10$
- B. $x \leq 10$
- C. $x > 10$**
- D. $x \geq 10$

Approaching Proficient

Write an inequality that can be represented by the graph on the number line shown?

Answer: $x > 10$

Proficient

Which statement could be represented by the inequality graphed on the number line shown?

- A. Shelly owes at least \$10.
- B. Jerika has at least 10 pencils.
- C. Brody has more than 10 cards.**
- D. Finnian has less than 10 books.

Above Proficient

Write a compound inequality to represent the graph on the number line shown.

Possible answers:

$0 \leq x < 3$ or

$x \geq 0$ and $x < 3$

Expressions & Equations

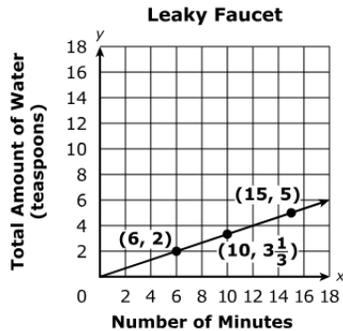

6.EE.9

Expectation at Proficient:

Write an equation to express one quantity, thought of as the dependent variable, in terms of the other quantity, thought of as the independent variable. Analyze the relationship between the dependent and independent variables using graphs and tables and relate these to the equation.

Below Proficient

The graph shows the number of teaspoons of water, y , that have dripped from a leaky faucet after x minutes.

Identify each variable as either the independent variable or the dependent variable.

Number of Minutes: _____

Total Amount of Water: _____

Number of Minutes:

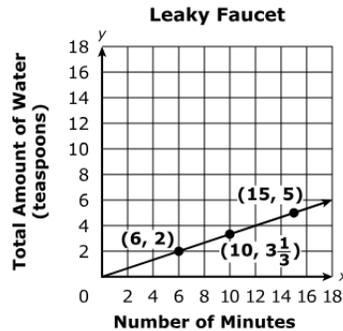

Dependent

Total Amount of Water:

Independent

Approaching Proficient

The graph shows the number of teaspoons of water, y , that have dripped from a leaky faucet after x minutes.

Which equation best represents the relationship between x and y shown in the graph.

A. $y = \frac{1}{3}x$

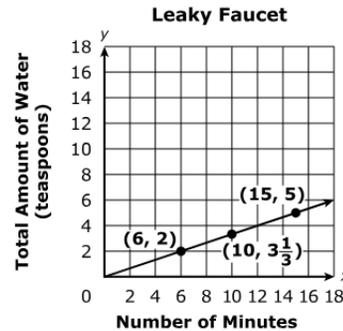

B. $y = 3x$

C. $y = \frac{1}{6}x$

D. $y = 6x$

Proficient

The graph shows the number of teaspoons of water, y , that have dripped from a leaky faucet after x minutes.

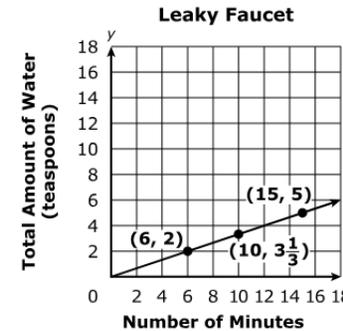

Write an equation to represent the relationship between x and y shown in the graph.

Answer: $y = \frac{1}{3}x$

Above Proficient

The graph shows the number of teaspoons of water, y , that have dripped from a leaky faucet after x minutes.

Write an equation to represent the relationship between x and y shown in the graph.

Answer: $y = \frac{1}{3}x$

Use your equation to predict the amount of water, in teaspoons, that will drip after 25 minutes?

Answer: $\frac{25}{3}$

Geometry

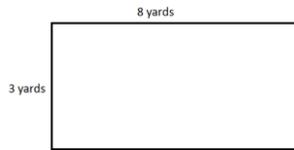

6.G.1

Expectation at Proficient:

Find the area of right triangles, other triangles, special quadrilaterals, and polygons by composing into rectangles or decomposing into triangles and other shapes. Apply these techniques to solve mathematical problems and problems in real-world context.

Below Proficient

A figure with dimensions, in yards, is shown.

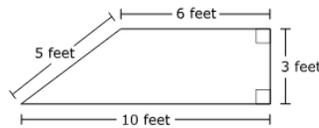

Determine the area, in square yards, of the rectangle.

- A. 11
- B. 22
- C. 24
- D. 38

Approaching Proficient

A figure with dimensions, in feet, is shown.

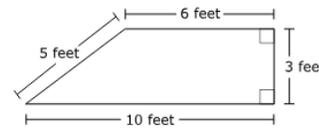

Determine the area, in square feet, of the figure?

- A. 18
- B. 24
- C. 30
- D. 32

Proficient

A figure with dimensions, in feet, is shown.

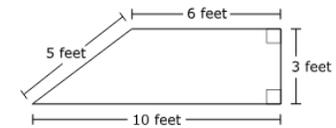

Determine the area, in square feet, of the figure?

Answer: 24

Above Proficient

Bailey is painting the top of a table in the shape of a trapezoid as shown.

What is the area, in square feet, of the tabletop?

Answer: 24

A tube of paint will cover 5 square feet. How many tubes of paint will Bailey need to paint the tabletop?

Answer: 5

Geometry

6.G.2

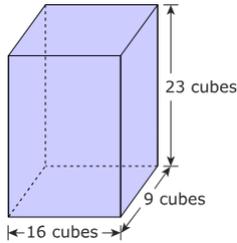

Expectation at Proficient:

Find the volume of a right rectangular prism with fractional edge lengths by packing it with unit cubes of the appropriate unit fraction edge lengths and show that the volume is the same as multiplying the edge lengths of the prism.

Apply the formula $V = Bh$, where B is the area of the base ($B = lw$) to find volumes of right rectangular prisms with fractional edge lengths in mathematical and real-world problems.

Below Proficient

A right rectangular prism is packed with identical cubes. The dimensions of the prism are given in terms of the number of cubes needed to fill the prism.

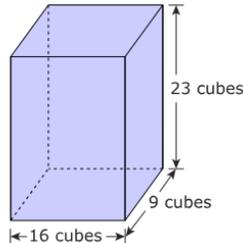

The side length of each cube is 1 inch. The area of the base, B , is 144 square inches. Use the formula $V = B \times h$ to determine which value represents the volume, in cubic inches, of the rectangular prism.

- A. 48
- B. 167
- C. 1192
- D. 3312**

Approaching Proficient

A right rectangular prism is packed with identical cubes. The dimensions of the prism are given in terms of the number of cubes needed to fill the prism.

The side length of each cube is $\frac{1}{4}$ inch. The height of the rectangular prism is $\frac{23}{4}$ inches.

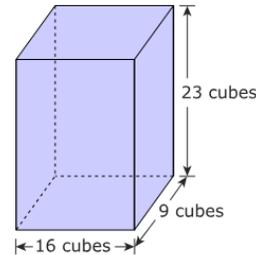

The area of the base is 9 square inches.

What is the volume, in cubic inches, of the right rectangular prism?

Answer: $\frac{207}{4}$ or $51\frac{3}{4}$

Proficient

A right rectangular prism is packed with identical cubes. The dimensions of the prism are given in terms of the number of cubes needed to fill the prism.

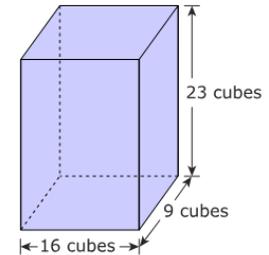

The side length of each cube is $\frac{1}{4}$ inch.

What is the volume, in cubic inches, of the right rectangular prism?

Answer: $\frac{207}{4}$ or $51\frac{3}{4}$

Above Proficient

A right rectangular prism is packed with identical cubes. The dimensions of the prism are given in terms of the number of cubes needed to fill the prism.

The side length of each cube is $\frac{1}{4}$ inch.

Explain how to determine the volume, in cubic inches, of the right rectangular prism?

Student response should include an explanation of how to use the formula to get $\frac{207}{4}$ or $51\frac{3}{4}$.

What color is your house?</p> <p>B. What is your middle name?</p> <p style="background-color: yellow;">C. How many pets do you have?</p> <p>D. How do you write your name?</p>	<p>Which question is a statistical question?</p> <p>A. How old is Mr. Jones?</p> <p>B. How many states has Mr. Jones visited?</p> <p style="background-color: yellow;">C. How many students eat lunch in the cafeteria each day?</p> <p>D. How many students are in Mr. Jones' class today?</p>	<p>Which equations are statistical questions?</p> <p>Select all correct answers.</p> <p>A. How old is Mr. Jones?</p> <p>B. How many states has Mr. Jones visited?</p> <p>C. How many students are in Mr. Jones' class today?</p> <p style="background-color: yellow;">D. How many students eat lunch in the cafeteria each day?</p> <p style="background-color: yellow;">E. How many pets does each student in Mr. Jones' class have at home?</p>	<p>Write 3 statistical questions about your school day.</p> <p>Explain the variability that you anticipate discovering in the data.</p> <p style="background-color: yellow;">Answers will vary and should include an explanation of how variability can be expected.</p>

Statistics & Probability

6.SP.2

Expectation at Proficient:

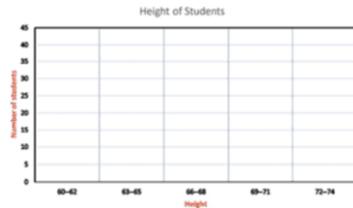

Describe the aspects of distribution (center, spread, and overall shape) for a set of data collected to answer a statistical question.

Below Proficient

The height of 100 students is recorded in the table shown.

Height	Number of Students
60-62	5
63-65	15
66-68	40
69-71	30
72-74	10

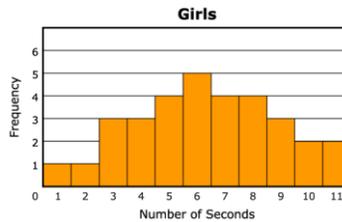

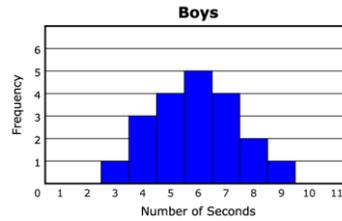

Complete the histogram using the data in the table.

Given a prelabeled graph, students should be able to draw bars according to the table.

Approaching Proficient

The histograms show the number of seconds it took a group of boys and a group of girls to complete a word puzzle.

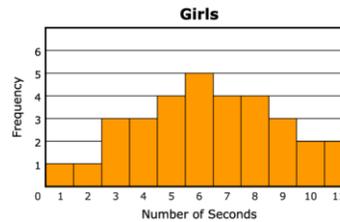

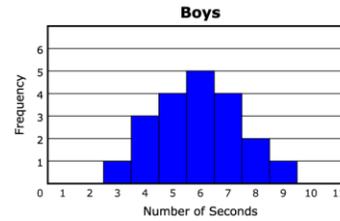

What is the center value of both histograms?

Answer: 6

Proficient

The histograms show the number of seconds it took a group of boys and a group of girls to complete a word puzzle.

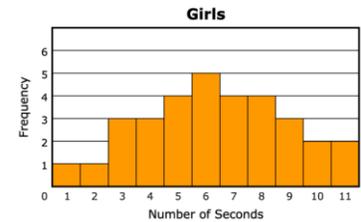

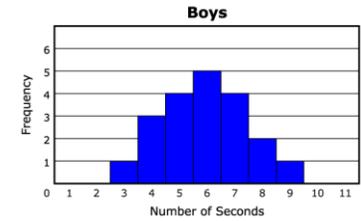

The spread of the boys' data is (greater than/less than) the center of the girls' data.

Answer: less than

Above Proficient

The histograms show the number of seconds it took a group of boys and a group of girls to complete a word puzzle.

Compare the graphs. Draw a conclusion about the center, spread, and overall shape of the data.

The centers are about the same, both are symmetrical however the spread of the girls' data is greater than that of the boys' data.

<p>Expectation at Proficient:</p> <p>Recognize that a measure of center for a numerical data set summarizes all of its values with a single number, while a measure of variation describes how its values vary with a single number.</p>	<p>Ms. Deb recorded the number of books read by 6 students in a month: 12, 15, 8, 10, 18.</p> <p>What is the mean (average) number of books read?</p> <p>A. 8 B. 12.6 C. 14 D. 15.2</p>	<p>Ms. Deb recorded the number of books read by 6 students in a month: 12, 15, 8, 10, 18.</p> <p>What is the mean (average) number of books read?</p> <p>A. 8 B. 12.6 C. 14 D. 15.2</p> <p>What is the range of the number of books read?</p> <p>A. 8 B. 10 C. 12 D. 18</p>	<p>Deb recorded the number of cups of water she drank each day for 7 days. The median daily number of cups of water she drank was 6. The range of the number of cups of water she drank was 4.</p> <p>Based on the given information, which statement is true?</p> <p>A. At least one day, she drank exactly 6 cups of water.</p> <p>B. The least amount of water she drank could have been 1 cup.</p> <p>C. The mean daily number of cups of water she drank is greater than the median daily number of cups of water.</p> <p>D. If the least amount of water she drank was 3 cups, then the greatest amount of water she drank was 9 cups.</p>	<p>Deb recorded the number of cups of water she drank each day for 7 days. The median daily number of cups of water she drank was 6. The range of the number of cups of water she drank was 4.</p> <p>On day 8, she drank 14 cups of water.</p> <p>Explain how adding the data from day 8 to the data set affects the shape, center, and spread of the data.</p> <p>Possible answers: The shape will be skewed right, the center and the spread will increase.</p>

Statistics & Probability

6.SP.4

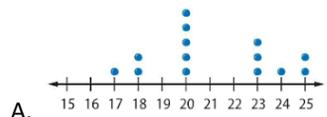

Expectation at Proficient:

Display numerical data in plots on a number line, including dot plots, histograms, and box plots.

Below Proficient

Which display is a histogram?

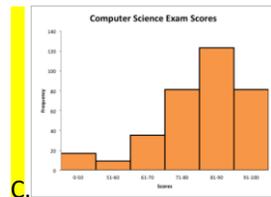

Number of Magazines Sold

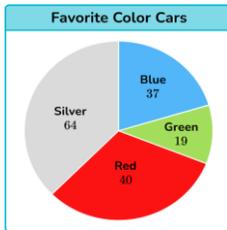

A.

B.

C.

D.

Approaching Proficient

The ages of animals at a zoo are listed in the table shown.

10	9	3	16	16	7
1	5	7	4	10	13
5	12	2	11	17	8
4	7	8	2	8	9

Which display would be most appropriate to show the distribution of ages in groups?

- A. Dot plot
- B. Coordinate plane
- C. Pie chart
- D. Histogram**

Proficient

The ages of animals at a zoo are listed in the table shown.

10	9	3	16	16	7
1	5	7	4	10	13
5	12	2	11	17	8
4	7	8	2	8	9

Complete the histogram to display the data.

Above Proficient

The ages of animals at a zoo are listed in the table shown.

10	9	3	16	16	7
1	5	7	4	10	13
5	12	2	11	17	8
4	7	8	2	8	9

Which display would be most appropriate to show the distribution of ages in groups?

Answer: Histogram

Create a display of the data in the table.

Statistics & Probability

6.SP.5

Expectation at Proficient:

Summarize numerical data sets in relation to their context.

Below Proficient

A data set is shown.

What is the mean of the data?

- A. 39
- B. 43
- C. 67
- D. 93

Approaching Proficient

A data set is shown.

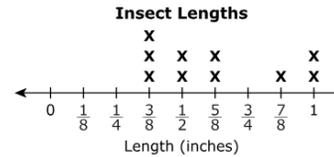

What is the mean of the data?

Answer: 43

Proficient

The mean length of an insect is 0.6 inch. The students in a science class measured 10 insects. The lengths are shown in the line plot.

Part A: How many of the insects have a length greater than 0.6 inch?

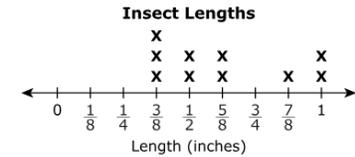

Answer: 5

Part B: What is the mean of the insects measured by the students?

Answer: $\frac{5}{8}$

Above Proficient

The mean length of an insect is 0.6 inch. The students in a science class measured 10 insects. The lengths are shown in the line plot.

Jana wants to predict the length of an insect. If she uses the mean, she will get a different answer than if she uses the data in the line plot. Explain which method will result in a more accurate prediction.

Answers will vary but may include that the mean is more accurate because the sample was larger.
