SCHOOL FINANCES: Site-Based Expenditure Reporting

Each year, the Illinois Report Card displays school-by-school spending for every district in the state.

Why

Site-based expenditure reporting offers a yearly look at where dollars go. Since these school-by-school spending data have been reported for several years, school communities can examine patterns and changes to resource allocation over time. Additionally, spending data can deepen local dialogue about how dollars can best serve students, acknowledging that the financial data alone rarely tell the whole story. Exploring the spending data in context can support greater understanding of the relationship between financial investments and student outcomes. It may also inform discussions of equity within a district. Site-based expenditure reporting is required by the federal Every Student Succeeds Act.

Who is included?

All districts – including School District 428, operated by the Illinois Department of Juvenile Justice – and charter schools authorized by the Illinois State Board of Education are required to report per-pupil expenditures at the school level.

What is reported?

District reports include the school's share of centralized expenditures, broken down by the expenditures' source of funds: federal vs. state and local. The local category includes any privately

or philanthropically funded expenditures, such as donations from a parent group or grants from a foundation. The per-pupil expenditures reflect regular and ongoing K-12 educational expenses; other expenses are reported separately as exclusions. Districts also have the opportunity to submit a written narrative to provide context for the data.

Where is it reported?

Visitors to the Report Card will find the site-based expenditure data under the School Finances tab on both the District Report Card and the School Report Card.
